This course provides an overview on the economic analysis of labor markets. The emphasis is on applied microeconomics and empirical analysis. Topics to be covered include: labor supply and demand, human capital, education and training, changes in the wages structure and inequality, biased technological change and returns to skills, organizational change and skill demand, the closing gender gap. The introduction of topics will be on textbook level, but the focus will be on the discussion of empirical implementation strategies used in recent publications.

Acquaintance of intermediate microeconomics or labor economics and econometrics is highly recommended.

The lecture will cover the most important aspects of the European economic development from the turn of the 19th century to the outbreak of the First World War. Topics include the Industrial Revolution, population growth and migration, international trade, the Gold Standard, as well as the economics of nationalism, colonialism and war. In the tutorial, we will discuss key texts and important concepts.

This lecture gives an overview of basic and advanced theoretical models of economic growth. We focus on questions like: Can we assume that all countries will grow at the same rate in the long run? What are the drivers for long-run growth? What are the challenges to modelling growth dynamics? Topics include the following: Economic convergence of countries, the Solow-Swan model, the Ramsey model, one- and two-sector models of endogenous growth, a model with expanding varieties, the Schumpeterian model of growth, diffusion of technology, and growth accounting.

At the end of the lecture, students are able to understand and apply exogenous and endogenous economic growth models for further research analysis. The problem sets are additional mathematical examples to give students a better understanding of the lecture.

The course requires prior knowledge of the lecture "Introduction to Adv. Macroeconomics".

Learning objectives: Students gain knowledge of recent advances in migration economics, particularly applied empirical analyses in the intersection of migration, economic development, political economy and labor economics with a focus on the effects of migration on economic development of source and destination countries. They are able to critically evaluate research on these topics and assess strengths and weaknesses of causal claims in economics papers. Students have familiarized themselves with data analysis and have reproduced some of the results of a few seminal papers in migration economics. Students are equipped to present papers in an academic setting. The students are able to identify gaps in the literature and develop research proposals that are empirically sound and add to the body of work in migration economics in a meaningful way.

Preconditions: The module "Econometric Methods" or equivalent knowledge is recommended.

Lecture: What is the effect of migration on economic development? In this course, we will look at the effects of international and regional migration on the diffusion of knowledge, the integration of countries into global markets through trade and FDI, as well as other diaspora externalities relevant to economic development. Synthesizing the conclusions of a number of seminal studies in the field and analyzing their empirical strategies, we will identify and critically evaluate various channels through which migration can alter the economic development of sending and receiving countries.

Exercise: Topics to be covered include: Instrumental variable methods, differences-in-differences, regression discontinuity design and other empirical strategies. There will be deep-dives into various papers, where students prepare referee reports and replicate findings of empirical papers on migration and cultural economics.

StO/PO MEMS 2016: 6 LP, Modul: "Applied Migration and Development Economics", Major: Macroeconomics

Prüfung:

Portfolio exam: The first assignment is to draft referee reports for several research papers (each about 300 words). The second assignment is to give a presentation on one research paper and give one presentation of a paper critique. The third assignment is to draft an original research proposal (about 2,500 words) related to the field of migration and cultural economics. The final grade will be given/will be awarded for the portfolio of all three assignments.

SPA 1, 21A

M. Reiske

In this seminar, we deal with two periods of radicalization: 1) the rise of the Nazis in Germany 2) the recent rise of populism in Western countries. We discuss recent empirical literature on these topics.

A component of the seminar is an ungraded presentation.

Required: A good understanding of econometrics and interest in economic history.

Max. 20 participants.

Application: Please send a mail to Monique Reiske (monique.reiske@hu-berlin.de) until September 30, 2022 indicating also the program you study. If there are more applicants than spots, we will draw a lottery in advance and let you know about the result at October 5, 2022.

Discussion of seminar topics: 15.11., 17.11.2022

Presentation and discussion of seminar papers: 07.02., 14.02.2023

In this seminar, the participants shall prepare and present a seminar paper. The participants choose a topic that fits to the seminar title, which means that it shall deal with the ongoing Corona crisis. Recommendable are topics, which analyze economic policy decisions (e.g. various fiscal and monetary policies, but also related to the labour market and social and family policies) and their effects and effectiveness. The effectiveness should take into account a short run as well as a long run perspective. How will the crisis and the policy responses to it change the functioning of the economy and society in the long run? How has the crisis changed our understanding of the functioning of economy and society? The paper can be empirical or theoretical. While it should have a strong policy focus, it should also explicitly build on the academic literature.

Part of the Seminar: Ungraded presentation and discussion.

To allow an intensive dialogue among the students, the seminar is organized in block classes. Many topics are closely related to each other.

Restriction to participation: 20

Registration: 10.10.2022 - 14.10.2022 via e-mail to mfratzscher@diw.de (Please indicate your program and matriculation number.)

Audience: Master students, PhD (BDPEMS, GC)

709933 Seminar in Labor Market Policy based on SOEP-Data (englisch)

2 SWS
SE

Mi

12-14

wöch.

SPA 1, 025

S. Seele

The seminar deals with three specific areas of empirical labor economics: **minimum wage, labor supply and migration**. The first part of the course (3 lectures) consists of an introduction to major ideas in these areas of research by Stefanie Seele and a brief introduction to the empirical work with the German Socio-Economic panel (SOEP) by a representative of DIW. After this, students present their topics, first briefly in a "round robin" format (10-15 minutes with discussion, no slides), then later in a more scientific seminar format (30-45 minutes with discussion) where students present empirical results from replicated SOEP-papers. The seminar paper or master thesis may be a critical review of an existing empirical work, replication of the original paper by re-estimation using the SOEP-data. Especially in the case of a master thesis, the student is rewarded for original thought and work on expanding an existing SOEP-based paper.

Please notice in advance until October 18th with the following information **"full name, email, () seminar paper or () master thesis"** via email to stefanie.seele@gmx.de. Please select (x) in case you plan to write a seminar paper or select (x) in case you plan to write a master thesis.

Max. number of participants: 30

Office hours: Dr. Stefanie Seele: Wednesday 10:15-11:45, (please opt in by email: stefanie.seele@gmx.de)

Literatur:

Selected SOEP-based papers in the areas **minimum wage, migration and labor supply** will be available on moodle.

709934 The Macroeconomics of the Green Transition (englisch)

2 SWS

SE

Mo

12-14

wöch. (1)

SPA 1, 21A

M. Burda,
A. Göth

1) findet ab 24.10.2022 statt

Moodle-Link:

<https://moodle.hu-berlin.de/course/view.php?id=116026>

The seminar explores the macroeconomics of the green transition. The goal is to provide an overview of macroeconomic issues governing and policies necessary to guide the green transition. The first part of the course (5 lectures) consists of an introduction to central macroeconomic aspects of the transition of our economy to non-carbon based energy and raw materials sources. In particular, we will discuss the well-known DICE model – a growth model which includes an explicit climate module – by William Nordhaus, as well as general equilibrium aspects of the green transformation. We will also present two projects of our own current research. During the seminar, we will dive into different ways of including climate aspects in macro models and learn about their caveats. Additionally, we will address aspects like the optimal carbon price or the implications of climate change for fiscal and monetary policy, as well as the distributional effects of climate policy. We plan to discuss some of the most important concerns such as uncertainty about climate damages, climate tipping points, and the role of technological progress relevant to the green transition. Finally, we will learn about the empirical evidence on carbon taxes, positive additional (co-)benefits due to emitting less greenhouse gas, and the potential of environmental tax reforms.

We will approach all these topics by reading and discussing current literature about the topics. As preparation for the first session, the video <https://www.youtube.com/watch?v=yHlg9txl7yM> is highly recommended (the carbon cycle is key to understanding climate change).

The seminar "Seminar in Labor and Macroeconomics" is restricted to students in Master's degree programs Economics/MEMS/ Business Studies at the Humboldt University, and having successfully completed IAMA (Introduction to Advanced Macroeconomic Analysis) is a prerequisite for participation. It culminates either in the writing of a seminar paper for a grade, or submission of the MA thesis. To submit a seminar paper or thesis, participants must have successfully presented their topic twice in a seminar setting. Master's thesis writers are expected to participate as registered students, even if they are not taking the course for credit. Public presentation of ideas is an essential component of the thesis preparation process.

Enrollment of the seminar is limited to 20. Registration is possible immediately (by Moodle); in case of excess demand, participation will be decided by lottery.

709905 Social Preferences - Theories and Evidence (englisch)

4 SWS

VL/SE

Di

10-14

wöch.

SPA 1, 23

D. Engelmann,
M. Sürer

Moodle-Link:

<https://moodle.hu-berlin.de/course/view.php?id=115175>

Social or other-regarding preferences refer to preferences of economic agents regarding other people's outcomes. These preferences can be both benevolent and malevolent, but crucially they differ from selfish preferences without any regard for others. The course provides an introduction to key evidence about the relevance of social preferences in economic interaction as well as the most important theoretical approaches that aim at explaining these results.

Most of the discussed evidence will be from controlled laboratory experiments. Critique regarding the relevance of (laboratory) experiments on social preferences will be discussed as well. Apart from methodological critique, experimental studies that critically reflect on prominent papers and research agendas will be presented in order to highlight the relevance of apparent subtleties in experimental design.

Specific requirements:

Some knowledge of game theory is helpful, but fairly basic experience is mostly sufficient. Knowledge of statistical analysis will make it easier to follow the data analysis in the experimental papers and thus enable a more critical view, but is not strictly necessary.

Maximum 30 participants, registration in the first/second week of the lecture.

Part of the seminar is an ungraded presentation.

1) findet vom 24.10.2022 bis 05.12.2022 statt

2) findet vom 26.01.2023 bis 27.01.2023 statt

Moodle-Link:

<https://moodle.hu-berlin.de/course/view.php?id=114318>

The students are able to characterize the specific role of emerging economies in the world economy. They know about stylized processes of (financial) development, about mechanisms of financial crises, the foundation and policy issues of microfinance, and the impact of individual characteristics on financial behavior.

Organization: The module "Emerging Markets" consists of a lecture plus a seminar. The lecture is conducted 4 hours per week during the first half of the semester. The seminar takes place on two days in January 2023. This course takes place in person, if this is possible according to regulations.

Time etc.: The seminar language is English. It takes place either at Humboldt-Universität or the DIW Berlin (Mohrenstr. 58) on two days (Thur/Fri). Most likely days are January 26 – 27, 2023. Please, keep these days reserved.

Application: Please, apply to the seminar until (and including) 31st October 2022 (6:00 pm) by sending the following information to Lorenz Meister, lmeister@diw.de:

- your first and second name
- enrollment number
- name of the master program
- semester during master studies
- your preferences for three of the offered topics
- case of hardship? (health, social, disability or family reasons)

In case of more than 20 applications we have to make a selection according to the rules of Humboldt-University.

In case of questions regarding the content of this seminar (and later discussion of your table of contents etc.), refer to Lorenz Meister, who is the seminar tutor (lmeister@diw.de).

Lecture timeline:

24.10.22 start of lecture

05.12.22 end of lecture

28.11.22 submission of special work performance (submit two short essays, 12,000 to 15,000 characters in total, i.e. about 3-4 pages each)

Seminar timeline:

31.10.22 seminar application deadline (please, not earlier)

01.11.22 decision about attendance if more than 20 applications and final allocation of seminar topics for presentations; thereafter preparation of your seminar paper; please, contact us to talk about your content /structure of thesis and in case of problems

22.12.22 submission of seminar paper of about 30,000 characters including spaces, i.e. about 12-15 pages)

23.01.23 submission of your summary about the seminar paper

26.-27.01.23 2 days seminar, presentations

Total requirements:

- Attendance at lecture, submission of special work performance (essays)
- Attendance at seminar, submission of special work performance (seminar paper), submission of summary of seminar paper, presentation about the seminar paper (about 30 minutes)
- Grading: depends on presentation; special work performances must be passed

Further information can be found on **Moodle** (**please use the password 'topics2023'**): Selected Topics of Emerging Markets (WiSe 22/23)

Steuerliche Gewinnermittlung: Es werden die steuerlichen Konsequenzen erarbeitet, die sich aus der Unternehmensgründung der Leistung von Sacheinlagen und der Liquidation von Unternehmen ergeben. Außerdem wird die steuerliche Gewinnermittlung tiefergehend betrachtet. Abschließend werden ausgewählte Probleme der Besteuerung von Personenunternehmen sowie des Gesellschafterwechsels analysiert.

Fundierte Kenntnisse in Grundzügen der Unternehmens- und Konzernbesteuerung werden vorausgesetzt.

Umsatzsteuer und steuerliches Verfahrensrecht: Die Studenten erlernen vor allem anhand von praktischen Beispielen aus der Rechtsprechung sowie aus dem Tagesgeschäft von Unternehmen die Systematik des Umsatzsteuergesetzes unter Vertiefung der Schwerpunkte wie Lieferung, Leistung, Organschaft, Vorsteuerabzug und Vorsteuerberichtigung.

Im steuerlichen Verfahrensrecht lernen die Studenten die Grundzüge der Abgabenordnung und ihre Verschränkung mit dem materiellen Steuerrecht kennen. Dabei liegt die Gewichtung auf dem Steuerbescheid und den Rechtsmitteln, der Festsetzungsfrist und den Änderungsvorschriften. Auch das Steuerstrafrecht und seine Bedeutung für die reguläre Veranlagung werden vermittelt. Das Erlernete wird anhand von Fällen und Fallstudien angewendet und vertieft.

This course complements Accounting I (Accounting Theory and Earnings Management) by providing insights on (a) how information can affect corporate decision-making and (b) how quantitative analysis tools can be used on administrative, field and experimental data to support sound business decisions.

The course will combine scientific evidence with real-life business cases. It should therefore be interesting to students who want to prepare for a corporate career in the area of accounting or governance as well as for students who consider writing their Master's thesis in the area of accounting.

Preconditions: To complete this module successfully, students will need a basic understanding of accounting concepts but no detailed institutional knowledge. In addition, students need to be familiar with basic concepts of microeconomics and econometrics.

Literatur:

All relevant material will be provided throughout the course.

Organisatorisches:

The objective of the "Financial Accounting Research Group" (FARG) is to introduce select students to current research in financial accounting. Participants of the FARG will learn the necessary skills to understand conceptual underpinnings and common empirical design choices in this area of research.

The FARG is organized around the Finance-Accounting Research Seminar that provides a forum for invited guest speakers to present current research papers. Participants of the FARG are welcome to attend the accounting talks of this seminar and expected to join internal discussion meetings of our institute in preparation of these talks. There are usually three accounting talks and three preparatory discussion meetings per semester. For details on the schedules of current and past semesters, please see here: Master students can obtain 6 ECTS by (i) participating in the FARG for at least two semesters and (ii) writing three reviews (or two reviews and a discussion protocol) on papers that are presented by our guest speakers. Bachelor students cannot obtain ECTS through the FARG, but they are very welcome to join our talks and discussion meetings for inspiration. Students who participated in the FARG for at least two semesters will receive a certificate that confirms their participation.

Enrolment into the FARG is possible at the beginning of each semester. Details on the application procedure will be announced in early April (summer term) and early October (winter term) via the website of our institute. The language of the seminar is English. The number of participants is limited to 20 students. We will base our choice of suitable students on § 90 ZSP-HU.

Registration until October 15, 2022 via Email: u.bruiggemann@hu-berlin.de

The main objective of the seminar is to support each participant in developing a research project that is suitable for a Master's thesis at the Institute of Accounting and Auditing. Note that only those students who successfully completed this seminar are eligible to write a Master's thesis at the Institute of Accounting and Auditing. The number of participants is limited (max. 10 students). For more details, please check our website ().

Prerequisites: Seminar participants are expected to have a sound understanding of accounting, corporate finance and econometrics.

Application period: 1 July to 21 October 2022

Organisatorisches:

StO/PO MA 2016: 6 LP, Modul: "Master's Thesis Seminar Accounting"

StO/PO MEMS 2016: 6 LP, Modul: "Master's Thesis Seminar Accounting", Major: Accounting and Finance

Prüfung:

Portfolio:

Seminar participants have to complete three assignments in order to show their learning progress.

- The first assignment is to replicate and extend parts of an already published empirical paper. The goal is to provide the participants with the necessary skills to conduct each step of an empirical analysis (i.e., data preparation, data description and data analysis) on their own. Students will work on the first assignment during the first half of the seminar for about six weeks.
- The second assignment is to prepare a research proposal. The idea is that the participants use their insights from the first assignment and the seminar meetings to develop a proposal as a potential foundation for their Master's thesis. Students will work on the second assignment during the second half of the seminar for about six weeks.
- The third assignment is to present the research proposal during the last seminar meeting to all other participants as well as selected members of our institute. Students are also expected to discuss the proposals of the other participants.

The final grade will be given/will be awarded for the portfolio of all three assignments.

The purpose of this seminar is to introduce students to major empirical research topics and methods in corporate finance in order to prepare them for writing a Master thesis. In the first part of the seminar we will review some of the main econometric techniques such as regression analysis, time series models, panel data estimation, and event studies from an end user perspective. The second part of the seminar consists of student presentations of important research papers in corporate finance. In addition, students are required to replicate an empirical research paper with new data using Stata or R.

Part of the seminar is an ungraded term paper.

Prerequisites: "Finance Theory" and at least 3 additional Master modules in Finance

To apply, please submit your documents (application form) to felicia.brown@hu-berlin.de latest on Monday, 10.10.2022. The application form you find here: <https://www.wiwi.hu-berlin.de/en/professuren/bwl/finance/study/application>

Marketing has evolved beyond being regarded mainly as art into a science. Today's marketing requires using quantitative data to inform and make marketing decisions. While data is often readily available or economical to collect, firms often lack the necessary analytical and managerial expertise to use this data effectively.

In this course, we will study quantitative approaches to 1) understand and measure consumer perceptions and attitudes, 2) measure drivers of consumer decisions, including customer acquisition and retention, 3) measure consumer preferences and demand, 4) identify consumer segments, and 4) build and utilize models of consumer choice.

The course aims to provide students with the necessary expertise to implement and participate in customer analytics efforts in the workplace. Hence, we employ a hands-on approach: each topic consists of lectures introducing a specific method, a tutorial on the implementation of the method using the statistical program R, and a session focusing on particular applications in marketing. In exercises and assignments, students will work with data sets. The course sessions will be a mix of in-person lectures and video pre-recordings. Please note this is not a hybrid course; pre-recordings will only be provided for R tutorials, which complement not substitute the in-person lectures and exercises.

This course requires knowledge of fundamental ideas in statistics, econometrics, and consumer behavior or marketing management. We do not expect you to know already how to use R, but we do expect you to be willing to put in the effort to learn it. More detailed information is provided in the course syllabus on the homepage of the Institute of Marketing at <https://bit.ly/3w3wL13>. Note that the course is under continual development. The schedule may be adjusted as we go (except for assignment due dates).

70 777 Seminar Information Systems (englisch)

2 SWS
SE Mi 12-14 wöch. SPA 1, 21B S. Lessmann,
A. Zharova

Learning Objectives: The module is concerned with recent developments and emerging technologies in the field of Information Systems. Students have the opportunity to develop the following skills: Students further develop their knowledge and understanding of the theories, applications and methods of Information Systems. Students are able to critically appraise recent IS trends and developments using established IS theories and practices. Students further develop their ability to conduct scholarly research, concentrating on academic writing, information retrieval and literature analysis.

Information from Moodle:

Welcome to our master seminar, in which you will grow your excellency in applied machine learning and develop your skills as a researcher. The seminar is designed as a follow-up to our graduate lectures and will ready you for writing a master dissertation in the wide scope of data science.

The overarching topic of this year's seminar is Applied Machine Learning for Smart Home and Digital Marketing. Within this scope, we have compiled a set of seminar topics that provide you with an opportunity to learn about recent developments in artificial intelligence research and real-world applications.

The seminar targets master students in their third study semester. Ideally, you have completed our MSc. modules [Business Analytics & Data Science](#) (BADS) and [Advanced Data Analytics for Management Support](#) (ADAMS) prior to taking the seminar. Specifically, we expect a solid understanding of (deep) machine learning and data science as well as proficiency in Python and/or R programming from every participant. These competencies can be acquired in the above modules but also elsewhere. Therefore, completion of BADS and ADAMS is recommended but not a mandatory requirement to participate in the seminar. Completion of other modules in the scope of computational statistics, econometrics, and machine learning prior to attending the seminar is useful but is not a requirement.

Part of the seminar: Ungraded presentation of the term paper and discussion.

Audience: master students in the 3rd semester (not suitable for students in the 1st semester)

Participation limit: 24

Registration for the seminar takes place online via AGNES till October 12, 2022.

This marketing seminar builds upon the Journal of Marketing Special Issue: Better Marketing for a Better World (Chandy, R. K. et al. (2021) 'Better Marketing for a Better World', Journal of Marketing, 85(3), pp. 1–9). This issue presents wide-ranging studies that deal with the evaluation of the contribution of marketing science and practice to the improvement in various aspects of the world. Based on this Special Issue, in this seminar, we will conduct a literature review leveraging concepts of marketing management and economic theory to address four key topics:

- Sustainability and Climate Concerns
- Economic and Social Empowerment
- Health and Wellbeing
- Prosocial Giving

For participation in the seminar, successful completion of the course "Advanced Marketing Modeling" or "Customer Analytics and Customer Insights" is a prerequisite for enrollment. Understanding of basic concepts from statistics (e.g., measurement error, statistical power, tests of significance, etc.) and data analysis are required.

The maximum number of participants is 20. To apply for this seminar, students must register (starting September 30 until October 14, 2022) for the course by sending an e-mail to contact@vlada-pleshcheva.com.

Detailed information will be provided in the syllabus on the [homepage](#) of the Institute of Marketing.

The students learn to understand the foundations and general properties of likelihood-based statistical inference and the Bayesian approach to statistical learning including the implementation of these approaches in statistical software using appropriate numerical procedures. Topics: likelihood function and likelihood principles, maximum likelihood estimators and their properties, numerical procedures for maximum likelihood estimation, likelihood-based tests and confidence intervals (derived from Wald, score, and likelihood ratio statistics), Bootstrap, Bayes theorem, Bayes estimators and their properties, Bayesian credible intervals, prior choices, computational approaches for Bayesian inference, model choice.

Organisatorisches:

Students are introduced to the basic concepts of statistical programming languages such as R or Matlab and their application. They have in-depth knowledge of the mathematical and algorithmic foundations of statistical software.

Reason for the block course: For pedagogical reasons, it makes more sense to teach the knowledge of a programming language in a block course.

The maximum number of participants is 30 students.

The application for a place in the course is made in the Moodle course until October 3, 2022. Please note that enrollment in the Moodle course is not sufficient and the registration deadline October 3, 2022 are binding! Participants will be selected according to the rules of the HU ZSP (lottery).

Please note that the course takes place within the 2nd examination period.

Organisatorisches:

1) findet vom 10.10.2022 bis 14.10.2022 statt

2) findet vom 24.10.2022 bis 28.10.2022 statt

Moodle-Link:

<https://moodle.hu-berlin.de/course/view.php?id=90845#section-3>

The students are introduced to the basic concepts of the statistical programming language Python and its application. They have in-depth knowledge of mathematical and algorithmic foundations of statistical software.

Recommended conditions: Statistik I and II

A component of the seminar is an ungraded presentation.

Group 1 (10.10. - 14.10.2022): takes place during the 2nd examination period (digital!).

Group 2 (24.10. - 28.10.2022): in presence (+ digital).

Reason for block course: For educational reasons it is more reasonable to teach skills of a programming language in a block course.

In addition, programming skills in Python are gaining in relevance for many study programs and an intensive course on such a topic can be included in the regular schedule more easily even for non-beginners.

The maximum number participants is 20 students per group. Application: 26 September to 03 October 2022 via Moodle.

Participants will be selected randomly before the first lecture according the rules of HU ZSP, § 90. If there are more registrations than places, the decision will be made by lot.

In this course you will develop a practical understanding of the key methods of causal inference used in modern applied microeconomics such as difference-in-difference, instrumental variables, and regression discontinuity designs, and how to apply these methods in Stata. The course will also show you how to assess the validity of each method, e.g. how to show parallel trends for a DD, or how to provide the first stage F-stat for an IV. The course will be assessed by a short term paper where you will put what you have learned into practice by carrying out a small applied research project. The course will have a workshop element for some of the last sessions, where you can work on the term paper, and/or other projects such as a dissertation, and I will come round and provide help with specific problems. There are no pre-requirements for the course, and there will be an introduction to using Stata. However, an interest in applied microeconomics as well as a little experience using statistical packages or basic programming may be helpful. *What won't be covered:* we will not cover time series econometrics or any theoretical econometrics. We won't look at any other statistical packages e.g. R.

To register, students should send an email to Dr. Sevrin Waights (sevrin.waights@hu-berlin.de) by October 7, 2022.

The objective of this course is to teach M.A. and Ph.D. students to use macroeconomic concepts and techniques for their own research and incorporates a higher degree of formal analysis than in the introductory master's lecture (IAMA).

Part I (Prof. Burda): Methods of modern macroeconomics for researchers in the field. Stationary Markov environments, state-space methods, stochastic difference equations. Dynamic programming and Lagrangian methods, complete markets, dynamic stochastic general equilibrium models, solution techniques. The Ramsey problem.

Part II (Prof. Weinke): Dynamic stochastic general equilibrium (DSGE) models for positive and normative macroeconomic analysis. To this end a number of theoretical and empirical concepts are presented: The computation of impulse response functions, structural vector autoregressions, as well as an introduction to structural estimation. On the normative side the concept of Ramsey optimal policy is presented.

Location: Ostrom-Hall, DIW Berlin, Mohrenstraße 58, 10117 Berlin.

Zum einen werden Grundprinzipien der Besteuerung dargestellt. Dabei wird beispielsweise aufgezeigt, wie der Steuerzugriff gerechtfertigt oder wie eine steuerliche Bemessungsgrundlage ausgestaltet werden kann. Zum anderen werden die für Unternehmen wesentlichen institutionellen Regelungen des deutschen Einkommen-, Körperschaft- und Gewerbesteuerrechts behandelt. Daran anschließend werden das Zusammenwirken dieser Steuern aufgezeigt und rechtsformabhängige Besteuerungsspezifika verdeutlicht. Es werden fundierte Kenntnisse im Bereich des externen Rechnungswesens vorausgesetzt.

Bitte beachten Sie: Studierende, welche die Prüfung 70618 "Grundzüge der Unternehmensbesteuerung" oder 70621 "Grundzüge der Unternehmens- und Konzernbesteuerung" bestanden und in das Bachelorstudium eingebracht haben, können die Prüfung 70605 "Grundzüge der Besteuerung" nicht in das Masterstudium einbringen!

707922 Business Analytics and Data Science (englisch)

2 SWS					
VL	Do	08-10	wöch.	SPA 1, 202	S. Lessmann

The module Business Analytics and Data Science (BADS) is concerned with theories, concepts, and practices to inform and support managerial decision making by means of formal, data oriented methods. Students have the opportunity to develop a variety of skills, including:

- Students are familiar with the three branches of descriptive, predictive and prescriptive analytics and appreciate the relationships between these streams.
- Given some data, students are able to select appropriate techniques to summarize and visualize the data so as to maximize managerial insight.
- Students understand the potential and also the limitations of predictive analytics to aid decision making. They comprehend when and how business applications can benefit from predictive analytics. Given some decision task, they are able to recommend suitable prediction methods.
- Students are familiar with statistical programming languages. Using standard tools, they can develop basic and advanced prediction models and assess their accuracy in a statistically sound manner.

The lecture is accompanied by a tutorial session, in which lecture topics are further elaborated. The aim of the tutorial is to develop and assess empirical models using contemporary data science software. More specifically, the Python programming language is used in tutorial session. Students who are not familiar with Python are given an opportunity to learn Python/programming fundamentals in the first weeks of the tutorial sessions. In order to acquire the skills needed for the course in such short time frame, students must be prepared to invest ample time into self-study exercises.

The course introduces econometric methods for analyzing cross-sectional data, panel data and time series data and discusses their applicability in practice. The following topics are covered: extensions and applications of the linear model; instrumental variable estimation; binary response models; truncated and censored regression, static panel data models; specification, estimation, validation and forecasting of autoregressive models. The application of these methods is explained and illustrated by means of empirical examples.

Der Kurs führt grundlegende Methoden der Ökonometrie zur Analyse von Querschnitts-, Panel- und Zeitreihendaten ein und diskutiert deren Anwendbarkeit in der Praxis. Folgende Themen werden behandelt: Erweiterungen und Anwendungen des linearen Modells; Instrumentalvariablenschätzungen; Modelle für binäre abhängige Variable; gestützte und zensierte Regression; statische Paneldatenmodelle; Spezifikation, Schätzung, Validierung und Vorgersage von autoregressiven Modellen. Die Anwendung dieser Methoden wird anhand empirischer Beispiele erklärt und illustriert.

In this seminar, we will deal with empirical research from two angles: First, we introduce core concepts from philosophy of science that are relevant for empirical research, e.g., critical realism and causality. Second, we practice conducting empirical research by critically reading and replicating existing research.

A component of the seminar is an ungraded presentation.

Required: A good understanding of econometrics (OLS and causal inference). Bachelor students are required to have taken the course "Introduction to Econometrics".

Max. 20 participants.

Application: Please send a mail to Felix Kersting (f.kersting@hu-berlin.de) until September 30, 2022 indicating also the program you study. If there are more applicants than spots, we will draw a lottery in advance and let you know about the result at October 4, 2022.

The course introduces students to entrepreneurial finance and venture capital, providing an overview of the venture capital industry and valuation techniques used in the area. Upon completion of the course, students will be familiar with (i) economic challenges faced by startups and how various forms of entrepreneurial finance help address them; (ii) main sources of entrepreneurial finance; (iii) institutional aspects of the venture capital industry; (iv) key valuation methods.

Prerequisites: Advanced Corporate Finance

To apply, please submit your documents (application form) to felicia.brown@hu-berlin.de latest on Monday, 10.10.2022. The application form you find here: <https://www.wiwi.hu-berlin.de/en/professuren/bwl/finance/study/application>

Max. 20 participants. If there are more applicants than spots, we will make a lottery in advance and let you know about the result.

Some dates are held in online format due to external speakers.

Dieser Kurs richtet sich an Studierende, die eine Seminar- oder Abschlussarbeit am Institut für Marketing schreiben. Er bietet keine zusätzlichen Credits und ist kein Ersatz für das reguläre Marketing-Seminar (siehe Voraussetzungen für [Bachelor](#) - und [Master](#) -Arbeiten). Der gesamte Stoff dieses digitalen (asynchronen) Kurses wird zum Selbststudium bereitgestellt. Es gibt keine Präsenzveranstaltungen, Sprechstunden, Aufgaben oder Noten. Der Kurs soll den Studierenden am Anfang einer Seminar- oder Abschlussarbeit am Institut für Marketing helfen und wir erwarten, dass die Studierenden die besprochenen Themen kennen und verstehen. Mit Hilfe mehrerer kurzer Videovorlesungen in Verbindung mit Folien und zusätzlichem Material lernen die Studierenden, wie sie 1) das Thema umreißen, inklusive der Entwicklung von Forschungsideen, der Definition von Forschungsfragen, der Suche und Durchsicht vorhandener Literatur, 2) verschiedene Arten wissenschaftlicher Arbeiten durchführen, 3) eine wissenschaftliche Arbeit (z.B. Seminar- und Abschlussarbeiten) verfassen, inklusive der Strukturierung der Arbeit, Richtlinien für das Zitieren vorhandener Literatur und die Formatierung der Arbeit, sowie Tipps und Do's and Don'ts für das Schreiben wissenschaftlicher Arbeiten.

This course is for students writing a seminar paper or a thesis at the Institute of Marketing. It does not provide additional credits and is not a substitute for a regular Marketing seminar (see prerequisites for [Bachelor](#) and [Master](#) theses). All the material in this digital (asynchronous) course is there for self-learning. There are no in-class meetings, office hours, assignments, or grades. The course is intended to help students at the beginning of a seminar or thesis at the Institute of Marketing, and we expect the students to know and understand the topics discussed. Through a series of short video lectures coupled with slides and additional material, students will learn how to 1) outline the topic, including developing research ideas, defining research questions, searching and reviewing existing literature, 2) conduct different types of scientific work, 3) write a scientific paper (e.g., seminar papers and theses), including how to structure the paper, guidelines on citing existing literature, guidelines in formatting the paper, as well as tips and dos and don'ts in scientific writing.

Einschreibung nicht über Agnes, Material über Moodle, Moodle-Key und Anmeldung nach Bedarf per E-Mail an: narine.yegoryan@hu-berlin.de und daniel.guhl@hu-berlin.de.

This seminar offers bachelor and master students the opportunity to write an empirical thesis on a labor market topic. Participants are expected to perform an empirical analysis, discuss the relevant literature, data sources, methodology and to acquaint themselves with the necessary institutional details and to present and discuss their work. Generally, the seminar presentations will be held in English. Bachelor students may hold their presentations in German after consultation with the lecturer.

Please register until October 05th, 2022 via e-mail to the secretariat of the Institute of Applied Microeconomics : kristin.schwier@hu-berlin.de

1) findet ab 24.10.2022 statt

Das Studienabschlussseminar bietet Studierenden im Bachelor- und Masterstudium die Möglichkeit, eine Abschlussarbeit zu Themen der Wirtschaftsgeschichte anzufertigen. Es wird der Aufbau wissenschaftlicher Arbeiten behandelt. Weiterhin werden Methoden vertieft, die zum Arbeiten im Bereich der Wirtschaftsgeschichte notwendig sind. Diesem Aufbau entspricht es, dass vor Anmeldung zum Seminar Vorkenntnisse in der Wirtschaftsgeschichte vorhanden sein müssen. Bachelorstudierende müssen daher mindestens ein Seminar des Instituts (das SE "Angewandte Demographie" von Herrn Dr. Michel zählt nicht dazu) und Masterstudierende mindestens eine Lehrveranstaltung des Instituts besucht und erfolgreich bestanden haben. Nach Vergabe der Themen werden die Studierenden die für Ihre Arbeit jeweils relevante Literatur den anderen Seminarteilnehmern vorstellen.

Die Seminarvorträge werden auf Englisch gehalten.

Anmeldung bitte per E-Mail (bis 04.10.2022) an Prof. Dr. Nikolaus Wolf: nikolaus.wolf@hu-berlin.de

Focusing on a specific topic within microeconomic theory, the seminar studies recent developments in the literature of mechanism design, contract theory, industrial organization, and organization theory. Students discuss and present related research papers, pointing out their interrelations and discussing their main contributions. The seminar puts a particular emphasis on understanding

the theoretical underpinning behind the papers' results and the economic mechanisms they capture. A major goal of the seminar is to find new open questions for future research. Participants are expected to attend all the sessions, read all the discussed papers beforehand, and participate actively in discussions.
